SUMMARY

Junior Data Analyst with a Management Information Systems (MIS) background and hands-on knowledge of data visualization, statistical analysis, and database management. Skilled in working with datasets, extracting insights, and presenting findings using Excel, SQL Server, Power BI, Python, and Tableau. Seeking a training or entry-level opportunity to apply analytical and problem-solving skills to real-world business data.

SKILLS

Technical Skills

- Data Analysis & Visualization: Power BI, Excel, Tableau
- Database Management: SQL
- Data Architecture: Data Warehousing
- Programming: Python

Soft Skills

- Communication & Teamwork
- Problem Solving & Critical Thinking
- Analytical Thinking
- Attention to Detail
- Adaptability & Time Management

EDUCATION

Bachelor's Degree in Management Information Systems (MIS)

Delta Academy for Science and Technology, Mansoura

October 2022 – October 2026

- Grade: Good
- Graduation Project: Excellent – Student and Volunteer Initiatives Management Platform.

CERTIFICATIONS

Data Analysis Certification

Route Academy

March 2026 – September 2026

PROJECTS

Customer Churn Dashboard, Power BI · DAX · Power Query · Data Modeling

- Designed and developed an interactive Power BI dashboard to analyze customer churn using customer demographics, subscribed services, billing, and account data.
- Created dynamic KPIs and visual reports to evaluate churn risk, customer behavior, contract types, payment methods, and service adoption.
- Applied DAX measures, Power Query transformations, and data modeling techniques to deliver actionable business insights and support data-driven customer retention strategies.

Sales Analysis Dashboard, Power BI · DAX · Data Modeling

- Designed and developed an interactive Power BI dashboard analyzing sales, shipping, product, and regional performance Across a 4-year period (2011–2014).
- Built 4 dynamic report pages featuring KPIs, trend visuals, and drill-down charts to support business insights.
- Implemented dynamic filtering by year, category, order status, and territory, enabling data-driven decision-making.

Student Performance Dashboard, Power BI · Data Visualization

- Designed and developed an interactive Power BI dashboard analyzing student academic performance across gender, ethnicity, and parental education level.
- Built key visuals including performance-level distribution, gender breakdown, and average scores by demographic factors.
- Delivered actionable insights highlighting correlations between parental education and student achievement.

Hotel Booking & Revenue Analysis, Microsoft Excel · PivotTables · Dashboard Design

- Analyzed 119K+ hotel booking records to identify booking patterns, cancellation behavior, revenue trends, and customer segments.
- Built an interactive Excel dashboard using PivotTables, Pivot Charts, and slicers to visualize monthly revenue, top revenue-generating countries, and booking lead time/channels.
- Identified a 37.04% overall cancellation rate, with long-lead bookings showing significantly higher cancellation rates than short-lead bookings.

Amazon Sales Dashboard, Microsoft Excel · PivotTables · Data Cleaning

- Cleaned and transformed raw Amazon sales data using Excel to prepare it for analysis and reporting.
- Built an interactive dashboard using PivotTables, Pivot Charts, and slicers to visualize monthly sales trends, category performance, and top-selling states/cities.
- Tracked order status distribution (Shipped, Cancelled, Unshipped) via courier data to monitor fulfillment performance.
